

ABDUL RAOUF AHMED

Full-Stack Developer & Python Automation Specialist • Security Hardening Enthusiast

Location: Cairo, Egypt Email: abdoumr81@gmail.com Phone / WhatsApp: +20 101 997 1508

Portfolio: harpy-code.github.io GitHub: github.com/abdelraouf-harpy

EXECUTIVE PROFESSIONAL PROFILE

Versatile Full-Stack Developer and Python Automation Specialist with demonstrated expertise in engineering high-throughput Telegram bot platforms, scalable web applications, and resilient data scraping pipelines. Backed by extensive hands-on security training (CEH & OSCP preparation with 120+ lab hours), focusing on defensive hardening, encrypted communication protocols, and resilient system architecture. Adept at shipping end-to-end production systems from architecture to client handoff with high reliability.

CORE TECHNICAL COMPETENCIES

Python & High-Throughput Automation

Python 3.11, asyncio, httpx, aiohttp, BeautifulSoup4, Playwright, Rate-Limiting, Deduplication pipelines, Task Scheduling.

Web & Full-Stack Platform Engineering

JavaScript (ES6+), Firebase (Auth & Firestore), Leaflet.js interactive maps, RESTful APIs, Responsive CSS, PWA, vCard generation.

Bot Architecture & Commerce Systems

Telegram Bot API (aiogram / pyTelegramBotAPI), Catalog navigation, Thermal receipt formatting, Kitchen dispatch, State persistence.

Security Hardening & Systems Engineering

CEH & OSCP Practical Labs (120+ hrs), X25519 Elliptic-Curve Handshake, Network Reconnaissance, Linux/Bash, FFmpeg Transcoding.

FEATURED PRODUCTION PROJECTS (1 / 2)

Giza Land — Commercial & Residential Real Estate Platform

gizaland.com ↗ | [GitHub](#) ↗

JavaScript ES6+ | Firebase Firestore | Leaflet.js Geospatial | Live Production Web

- Architected a comprehensive real estate platform covering Giza Governorate (Sheikh Zayed, 6th of October, Hadayek Al Ahram, Dokki) with responsive UI.
- Integrated Leaflet geospatial maps with dynamic marker clustering, geocoding search, and real-time Cloud Firestore synchronization for listings.
- Built verified owner identity workflows and direct WhatsApp communication channels operating under a fixed 1.5% commission model.

Harpy Order Management Suite

harpymenu.com ↗

Python 3.11 | Telegram Bot API | Kitchen Dispatch | Thermal Printing

- Engineered end-to-end commerce automation combining a customer-facing Telegram bot catalog with real-time kitchen order dispatch.
- Implemented category browsing, interactive cart calculation, and auto-formatted order slips for kitchen thermal printers, cutting turnaround times.

Autonomous Real Estate Broker Bot

[@brookers_bot](#) ↗

Python | Async Web Scraping | Algorithmic Valuation | Instant Telegram Alerts

- Built a high-frequency property scraper polling public listings with polite rate-limiting, deduplication, and automated price-per-sqm benchmark analysis.
- Dispatches structured deal notifications with automated valuation metrics and direct owner contact links straight to Telegram channels.

FEATURED PRODUCTION PROJECTS (2 / 2)

Enterprise Infrastructure Monitoring & Telemetry HUD

[GitHub Repository](#) ↗

C++ Agent Python Asynchronous Server X25519 Encryption Network Telemetry

- Engineered a high-security endpoint telemetry system featuring end-to-end encrypted sessions using X25519 elliptic-curve key exchange.
- Implemented resilient auto-reconnect loops with exponential backoff handling packet loss and volatile connections with minimal memory overhead.

HARPY Downloader Bot — Media Conversion & Delivery

[@harpy_one_bot](#) ↗

Python AsyncIO FFmpeg Transcoding Chunked Streaming SQLite Persistence

- Multi-platform video and audio extraction bot powered by asynchronous Python worker pools and optimized stream downloading.
- In-flight FFmpeg transcoding and automatic chunking for files exceeding platform limits, backed by SQLite user state logging.

Smart NFC Contactless Identity Platform

[harpymenu.com/cards](#) ↗

HTML5 / CSS3 Client-side vCard (.vcf) NFC / QR Integration PWA Architecture

- Lightweight digital identity platform linking physical NFC cards and QR codes to instant contactless contact downloads without third-party apps.
- Engineered purely on client-side static technology delivering sub-second loading speeds across modern iOS and Android smartphones.

SECURITY TRAINING COURSES & PRACTICAL LABS

CEH (Certified Ethical Hacker) Training Course

EDUX Academy, Cairo, Egypt • 60+ Lab Hours

Intensive practical training covering network reconnaissance, vulnerability assessment (OWASP Top 10), web application security auditing, packet inspection, and defensive hardening configurations.

OSCP Preparation Course (Offensive Security Preparation)

EDUX Academy, Cairo, Egypt • 60+ Lab Hours

Hands-on penetration testing training in isolated virtualized lab environments covering active scanning, privilege escalation (Linux/Windows), buffer overflow concepts, Active Directory attack paths, and post-exploitation reporting.

LANGUAGES & OPERATIONAL ATTRIBUTES

Language Proficiencies

Arabic: Native (اللغة الأم)

English: Professional Working Proficiency (Technical documentation, engineering discussions, and client communication).

Availability & Engagement Modes

Location: Cairo, Egypt (GMT+2 / UTC+3).

Availability: Available for Full-Time Roles, Remote Engagements, and Project-Based Contract Automation.

ONLINE VERIFICATION & REPOSITORIES
